DETAILED ACTION

This office action is a response to the restriction requirement filed on 4/26/04.

Response to the Restriction Requirement

1. Applicant's election with traverse of Group I, Species C, claims 1, 3, 6-15, 17, 23-29 and 32-35 in the reply filed on 4/26/04 is acknowledged. The traversal is on the ground that all the claims as filed would not require additional searching, not place any undue burden on the patent office. This is not found persuasive because these inventions (Group I and II) are distinct for the reasons given last office action mailed on 3/23/04 and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Accordingly, the claims for the elected Species C is 1, 3, 9-15, 17, 23-29 and 32-35.

The requirement is still deemed proper and is therefore **made FINAL**.

2. Claims 2, 4-8, 16, 18-22, 30 and 31 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 4/26/04.

3. Upon further consideration with newly submitted claims 23-29 and 32-35, the further restriction to the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3, 9-15, 17, 23-29, 32 and 33, drawn to a method of forming a beveled writing pole of perpendicular writing element, classified in class 29, subclass 603.07.

- II. Claims 34 and 35, drawn to a method of forming a ramped step, classified in class 29, subclass 592.1.

4. Inventions Group I and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (Group I) as claimed does not require the particulars of the subcombination (Group II) as claimed because the combination (Group I) as claimed does not require a lift-off mask. The subcombination has separate utility such as a lift-off mask.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
